## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2, 5, 8, 9, and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Leistenschneider (US Patent 5017847).

Claims 1 and 8, Leistenschneider teaches an apparatus and method for adjusting the sensitivity of rain sensor used in a wiper device comprising a control device 9, a sensor 1, and a vehicle speed sensor 10, wherein the control device adjusts the sensitivity of the sensor based on the output of the speed sensor, see column 4 lines 4-47.

Claims 2 and 9, Leistenschneider describes that the sensitivity of the rain sensor increases when the vehicle speed is low, see column 4 lines 37-42.

Claims 5 and 12, Leistenschneider describes that the sensitivity of the sensor is adjusted in a single wiping cycle, see the background/summary of the invention.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 3, 4, 7, 10, 11, and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Leistenschneider (US patent 5017847).

Leistenschneider discloses the claimed except for the speed values and the time intervals. It would have been obvious to one of ordinary skill in the art at the time of the invention was made to choose specific speed values and time intervals, since it has been held that discovering an optimum value of a result effective variable involves only routine skill in the art. *In re Boesch*, 617 F.2d272, 205 USPQ 215 (CCPA 1980).

#### ***Claim Objections***

5. Claims 6 and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The documents cited in form PTO-892 teach other rain sensors that adjust its sensitivity based on vehicle speed.

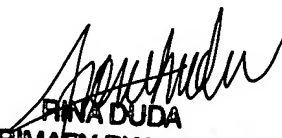

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rina I Duda whose telephone number is 571-272-2062.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Martin can be reached on 571-272-2800 ext. 37. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
